

# COMPANY PROFILE

Gammatec NDT Supplies SOC Ltd was established in 1981 as Gammatec Engineering (Pty) Ltd, a company specialising in the manufacturing, marketing, sales, and support for and to the Non-Destructive Testing industry. In 2009 the founding shareholders retired from the company with the sale of shares to NTP Radioisotopes SOC Ltd, a state-owned company and subsidiary of the South African Nuclear Energy Corporation SOC Limited (NECSA).

From establishment to 1994 the company focused on the South African market. After 1994 the company quickly expanded into Africa, Middle East and South-East Asia and today has a customer base in over 70 countries.

Gammatec Head Office is situated in Vereeniging, South Africa, from where it directly services its customers. Additional support is provided by dedicated distributors in Dubai and Kuala Lumpur. There are numerous appointed non-exclusive distributors in territories to provide personal interface support and service.

Gammatec is an equity shareholder in a Belgian company, Oserix, a leading supplier of Projectors and industrial isotopes for territories including Europe and North Africa and the principle distributors of the Exertus range of Projectors.

The Gammatec range of Non-Destructive Testing equipment, accessories and consumables includes the following:

- Acoustic Emission Testing (AE)
- Liquid Penetrant Testing (PT)
- Electromagnetic Testing (ET)
- Radiographic Testing (RT)
- Ultrasonic Testing (UT)
- Hardness Testing
- Coating Inspection
- Visual Inspection
- Infrared & Thermal Testing
- Leak Testing (LT)

Gammatec is the authorised distributor for global leaders including Carestream (Industrex Film and Digital CR Systems), Cygnus (Ultrasonic thickness gauges), NTP (Isotopes), Oserix (Gamma ray Projectors and Isotopes), Phoenix (UT Scanners and Transducers), Sonatest (UT and PA Equipment and Accessories) Teledyne ICM (X-ray), Zetec (PA and EC Equipment and Accessories), SciAps (Positive Material Identification), Maxwell (Pulsed Eddy Current), Tracerco (Radiation detection), Flyability (Inspection Drones), Incertech (Heat Treatment equipment and consumables) and Chemetall (MPI & Dye Pen consumables) MFE Enterprises Incorporated (Tank Floor Scanners); BASF Chemetall (MPI & Dye Penetrant consumables)

Gammatec Head office and our dedicated distributors have electronic and mechanical maintenance departments with qualified technicians capable of repairing, maintaining, and calibrating the wide range of products sold.

Gammatec's highly trained national and international sales and administrative staff will quickly and efficiently facilitate customer enquiries and purchases. Sensitive products such as Radioisotopes and Ultrasonic Flaw Detection equipment are handled with competence and ease.

Gammatec prides itself on being an NDT industry product, service, and support leader.

Gammatec staff are responsible for ensuring complete satisfaction of customer needs by meeting and exceeding their expectations. The Group goal is 100% customer satisfaction 100% of the time. The Turnkey One-Stop policy that Gammatec offers customers makes Gammatec an exciting and interesting organisation and is backed up by the Group's Motto "CUSTOMER IS KING".

Gammatec supports the industry in achieving a safe work environment, providing a suitable return on investment for shareholders, a positive environment for staff to work in and a commitment with action to ensure the wellbeing and protection of the environment.
